## President & Chief Executive Officer

International CCS Knowledge Centre

Location: Regina, Saskatchewan

**Carbon capture and storage (CCS) is essential today and into the future. You could be the new CEO leading the charge with people who have actually done it – and have done it big!**

*Intent to see impactful climate action, coupled with expertise and capability, at the International CCS Knowledge Centre, we've got the drive to see momentum in the next iterations of large-scale CCS.*

*Join us. It's going to be big!*

## WHO WE ARE

### International CCS Knowledge Centre

At the International CCS Knowledge Centre (Knowledge Centre), we take climate action seriously. We are dedicated to advancing the understanding and use of large-scale carbon capture and storage (CCS) as a means of managing greenhouse gas emissions, globally.

We know that the world can't get to net zero starting from ground zero – so we provide the know-how to implement large-scale CCS projects as well as CCS optimization. We house experts who were instrumental in the development and operations of the Boundary Dam 3 CCS Facility as well as the authors of the comprehensive second-generation CCS study, known as the Shand CCS Feasibility Study. We offer practical, hands-on experience-based guidance, technical advice for planning, design, construction, and operation of large-scale applications of CCS from thermal power to industrial processes.

Our team actively engages financiers and decision makers to ensure high-level information on CCS is conveyed with political, economic, and other broad considerations. By promoting and contributing to the technical advancement and cost reductions of second-generation CCS, organizations are better positioned to de-risk investment decisions.

The Knowledge Centre places high value on information and expertise that is permitted to be broadly shared with multiple parties. This promotes research, innovation, and deployment by reducing the cost and risk associated with new CCS projects around the world.

## WHO YOU ARE

### President & Chief Executive Officer

As the President & Chief Executive Officer your key qualities include providing inspiring and innovative leadership and drive as well as being a strong contributor to the establishment and realization of long-range goals and financial management. You are dedicated to the advancement of climate action initiatives and foster a global network to enable such action.

Accountable to the Knowledge Centre's Board of Directors, you are empowered to lead the development of the long-term vision and strategy; and are responsible for the core functions to meet the mandate of the corporation. This includes managing the day-to-day operations and executing the approved operating plans while ensuring the corporation has developed, and adheres to, its policies and procedures.

You have a proven track record and over 15 years of senior leadership experience along with relevant post-secondary education. You have a keen interest and a strong knowledge base in large-scale CCS and/or climate action policy. An understanding of the energy sector and other industry considerations would be considered a definite asset.
