

Job Opportunity

Project Manager

International CCS Knowledge Centre

Location: Regina, Saskatchewan

Closing date: November 1, 2021

The next iteration of large-scale carbon capture and storage (CCS) is underway. Join the International CCS Knowledge Centre's project delivery and advisory team – those who have actually done it – and have a hand in it too!

Intent to see impactful climate action, coupled with expertise and capability, at the International CCS Knowledge Centre, we've got the drive to see momentum in the next iterations of large-scale CCS.

WHO WE ARE:

Join us. It's going to be big!

International CCS Knowledge Centre

At the International CCS Knowledge Centre (Knowledge Centre), we take climate action seriously. We are dedicated to advancing the understanding and use of large-scale carbon capture and storage (CCS) as a means of managing greenhouse gas emissions, globally.

We know that the world can't get to net zero starting from ground zero – so we provide the know-how to implement large-scale CCS projects as well as CCS optimization. We house experts who were instrumental in the development and operations of the Boundary Dam 3 CCS Facility, the authors of the comprehensive second-generation CCS study, known as the Shand CCS Feasibility Study, as well as the leaders in the Lehigh CCS Feasibility Study, examining the application of carbon capture on cement.

We offer practical, hands-on experience-based guidance, technical advice for planning, design, construction, and operation of large-scale applications of CCS from thermal power to industrial processes.

Our team actively engages financiers and decision makers to ensure high-level information on CCS is conveyed with political, economic, and other broad considerations. By promoting and contributing to the technical advancement and cost reductions of second-generation CCS, organizations are better positioned to de-risk investment decisions.

The Knowledge Centre places high value on information and expertise that is permitted to be broadly shared with multiple parties. This promotes research, innovation, and deployment by reducing the cost and risk associated with new CCS projects around the world.

Job Opportunity

WHO YOU ARE:

Project Manager

As the Project Manager your key qualities include being a results-oriented thinker, with the ability to influence and manage complex and confidential projects and issues with an eye on the broader picture and do so with sensitivity and professionalism.

Accountable to the Knowledge Centre's Vice President of Project Development and Advisory Services, as the Project Manager you provide leadership and direction to a portfolio of projects and teams.

In this role, you are responsible for the effective utilization of people, material, financial resources, and external participants to manage, coordinate and lead projects for the whole project lifecycle, while ensuring alignment with client, departmental and corporate strategic goals, and objectives. Additionally, you provide key leadership and direction to the project team and ensure excellence in communication, quality, risk and procurement integration and strategies.

Qualifications

- Bachelor's Degree in Engineering (experience in carbon capture technology preferred)
- Eligible for membership in the Association of Professional Engineers and Geoscientists of Saskatchewan, or;
- Professional Engineering Designation (P.Eng.)
- Related professional designation(s) and/or certification(s) (PMP, Prince2)
- 10 Years of experience planning and providing contract management and coordination of projects

Skills & Abilities

Management of complex and multiple projects/issues

- Ability to manage scope, schedule, cost, contracts, and relationships between stakeholders for assigned projects
- Ability to strategize, plan, organize, manage project schedules, report on progress, trends, and variances
- Ability to meet deadlines and deal with quick turnarounds and take corrective action when projects deviate from original plans and objectives
- Ability to manage project budgets, estimates and forecasts
- Ability to prepare contracts and negotiate revisions, changes, and additions to contractual agreements with consultants, clients, suppliers, and subcontractors
